**DESIGNED TO LAST A LIFETIME**

## Numerous Advantages for Security Parking Facilities

Electric Power Door's hydraulic four fold doors are engineered to meet your security, functional, and aesthetic needs with a variety of options. EPD's Four Fold Doors can be equipped with automated controls for loop detectors, card readers, photo eyes, and barrier arm gates. Aesthetically custom designed panels are available with louvers, grills, security mesh, flat sheeting, or decorative panel sheeting to complement their surroundings.

Doors designed to last more than 10 times that of conventional doors, with minimum maintenance and quick open and closing times -operating at two feet per second. Hydraulic and electronic operator controls can be remotely located for security and enhanced serviceability. EPD doors are durable and abuse resistant, constructed of structural steel and heavy 14-gauge sheeting. Hinged door panels with no chains, spring counterbalances, garage door rollers, or side guides to maintain.

Wind and weather resistant doors that are able to operate in almost any condition. Doors are engineered to handle high wind loads, are insulated for extreme temperatures, and weather-stripped for a tight seal.
