

**ELECTRIC  
POWER DOOR**

# SALLY PORT DOORS

**DESIGNED TO LAST A LIFETIME**

## Engineered to meet your security, functional, and aesthetic needs

Electric Power Door's electric and hydraulic four fold doors can be made with a variety of options including, automated controls, custom designed panels, bullet resistant panels, and vision lights.

EPD doors have 10 times more cycles than that of conventional doors, even in high winds and extreme temperatures. Electric and hydraulic Four Fold Doors have a quick open and close time - doors operate at two feet per second. The controls can be remotely located for security and enhanced serviceability. EPD Sally Port Doors feature hinged door panels - no chains, spring counterbalances, garage door rollers, or side guides to maintain. The doors are constructed with structural steel and heavy 14-gauge sheeting. If required, the door can be heavily insulated and weatherstripped for a tight seal.
